# The Importance of Open Science and Research Integrity for Scientific Progress

**Lecture series for Master and PhD students, Spring semester 2020, Friday 9 - 12 a.m.**
Main Building, 120, Hochschulstrasse 4, 3012 Bern

This course provides an overview on open science and reproducible research. It shows how the replication crisis has changed research in different fields (psychology, medicine, life science, business and informatics) and addresses the solutions to achieve reproducible science. **www.bit.ly/OpenScienceBern**
